NXFX Arbitrage Expert - Strategy Guide

Minimum Deposit / Recommended Account Size:

- \$1,000 USD minimum recommended
- Lot sizing: 1k USD = 0.01 lot base for stable performance

1. Timeframes:

- M1 and M5 for signal execution
- Designed for fast but non-HFT trading

2. Trade Type:

- Only Buy or Only Sell recommended (activate the main signal based on market conditions)

3. Best Trading Hours:

- 11:00 to 20:00 (broker's local time or UTC+0)
- Reason: Highest market movement and liquidity during this period

4. Account Type:

- ECN account required
- Low spreads and reliable execution, no high-end VPS needed

5. News Handling:

- Avoid opening new trades shortly before or after major news events
- Correct timing improves trade stability and reduces risk

6. Currency Pairs (USD-based, divided into two sets):

- Set 1: EURUSD, GBPUSD, EURGBP
- Set 2: USDJPY, EURJPY, EURUSD
- Base volume is equally distributed within each set for balanced risk

7. Strategy Notes:

- Only one set should be active at a time (Set 1 or Set 2)
- Focus on high liquidity periods for better execution
- VPS standard setup is sufficient; high-frequency infrastructure not required

8. Disclaimer:
