

COMPLETE INSTALLATION GUIDE

TITAN V10

MT5 EDITION

This guide explains step-by-step how to correctly download, install, and activate the robot on MetaTrader 5 (PC & VPS).

- ☑ Download files from Telegram
- ☑ Installation in MQL5 folder
- ☑ Load Optimized Presets (.set)

METATRADER 5 ONLY

01 GET FILES (TELEGRAM)

Download the two necessary files from the official Telegram channel to a folder on your desktop. **Do not try to open them!** Just save them.

SIMULATION: YOUR DOWNLOADED FILES

TFXS_Titan_M
T5.ex5

THE ROBOT

TITAN_GOLD.set

SETTINGS

Tip: You will need both files for a correct installation. The .ex5 is the engine, the .set file contains the instructions.

02 INSTALLATION ON MT5

- ▶ In MT5, go to **File** (Top Left) → **Open Data Folder**.
- ▶ Navigate through the folders to reach the final destination:

... > MQL5 > **Experts**

- ▶ **Copy and Paste** the robot file (.ex5) into this **Experts** folder.
- ▶ Go back to MT5, right-click on "Expert Advisors" in the Navigator and press **Refresh**. The robot will appear in the list.

03 LOADING "SETS" (.SET)

Open the desired chart (e.g. XAUUSD M15) and drag the robot onto the chart. In the settings window, "Inputs" tab, **you must load the .set file.**

SIMULATION: EA Properties Window (Bottom Right Corner)

 Load

- ▶ Click the **Load** button and select your downloaded .set file.
- ▶ The parameters will change automatically. Do not modify them manually!
- ▶ Make sure to paste your LicenseKey in the first field if the Set does not include it.
- ▶ Click **OK**.

04 FINAL VERIFICATION

For the robot to operate, check these two visual indicators in your MT5 platform:

1. TOP BAR MT5

▶ **Algo Trading**

Must be GREEN (Play)

2. CHART CORNER

Blue Hat Icon Visible

If both indicators are active, congratulations! TFXS TITAN is now scanning for trades according to its strategy.
